Abstract

This is a very simple document, intended to serve as a starting point for those who want to create a LaTeX paper. As a simple article, you can just replace the sections you plan to use, delete the ones you wont, and configure the settings and references as you wish.

Keywords: LaTeX, Simple, Template

1 Introduction

Hello, world! This is a very simple document for beginners. It will not contain many different structures and resources, as it is intended to be simple, but you can search for further examples on the Internet. For example, the LaTeX Manual for Authors (3) contains plenty of good tips.

With LaTeX it is easy to cite articles, like this one written by Author (1), or even a book, like this (2). Try changing some options in the configuration file and check out the results. Happy writting!
